SUMMARY

Offensive Security enthusiast with hands-on experience in penetration testing, web application security, and adversarial simulation. Built production-grade attack detection and SOAR platforms with deep MITRE ATT&CK knowledge. Completed 55/55 PortSwigger Web Security Academy labs across Authentication, Access Control, and HTTP Request Smuggling. CySA+ certified with strong skills in OWASP Top 10, network security, Python scripting, and emerging domains including cloud and AI/LLM security.

EDUCATION

VIT Bhopal University

B.Tech in Computer Science | CGPA: 8.05

Bhopal, India

Aug 2023 – Present

EXPERIENCE

TheRedUsers

Cybersecurity Intern – Offensive Security & Detection

Delhi, India

Feb 2025 – Mar 2025

- Conducted web application security assessments on intentionally vulnerable targets (WebGoat) using Burp Suite and OWASP ZAP on Kali Linux; manually identified and exploited OWASP Top 10 vulnerabilities including SQL Injection, XSS, and CSRF, and documented findings with reproduction steps and remediation recommendations.
- Monitored and analyzed 50+ network and host-based security events using Wireshark and Splunk SIEM; correlated Windows/Linux event logs to identify attack patterns including brute-force, privilege escalation, and lateral movement, mapped to MITRE ATT&CK techniques.
- Automated security triage and reporting workflows with Python; authored structured vulnerability reports and SOC playbooks for 5+ recurring attack categories, reducing manual analysis time across the team.

PROJECTS

AI-Powered SOC/XDR Platform v3.0 | FastAPI, Elasticsearch, Next.js, Python, Google Gemini, NXLog

- Engineered a full SIEM/XDR pipeline (NXLog → FastAPI → Elasticsearch) with real-time Windows/Sysmon log ingestion; built custom detection rules for brute-force, privilege escalation, LOLBin abuse, and lateral movement (MITRE ATT&CK: T1059, T1078, T1110, T1218).
- Built CTI enrichment pipeline integrating AbuseIPDB and AlienVault OTX for live IOC scoring and geolocation; developed AI-assisted triage with Google Gemini for attack chain correlation and severity scoring, with exposure to AI system security and prompt-based interaction patterns.
- Extended platform with a SOAR engine featuring rule-triggered playbook execution, analyst approval workflows, and simulated containment actions (IP blocking, host isolation, escalation ticketing) with full audit logging modeled against NIST SP 800-61 IR phases.

Web Application Penetration Testing Lab | Burp Suite, OWASP ZAP, Metasploit, WebGoat, DVWA, Kali Linux

- Completed 55/55 PortSwigger Web Security Academy labs across Authentication (password-based attacks, MFA bypass, session/cookie manipulation, password reset poisoning), Access Control (vertical/horizontal privilege escalation, IDOR, HTTP header bypass), and HTTP Request Smuggling (CL.TE, TE.CL vulnerabilities); developed practical exploitation skills using Burp Suite Intruder, Repeater, and Proxy.
- Set up and exploited intentionally vulnerable applications (WebGoat, DVWA) for manual and tool-assisted exploitation of SQL Injection, XSS, CSRF, IDOR, and insecure deserialization; documented exploitation steps and mitigation recommendations in structured vulnerability reports.

TECHNICAL SKILLS

Offensive Security: Penetration Testing, Web Application Security, Vulnerability Research, API Security Testing, Network Reconnaissance, Exploitation, Attack Simulation, Threat Modeling, OWASP Top 10, OWASP API Top 10

Tools & Platforms: Burp Suite (Proxy, Intruder, Repeater, Scanner), OWASP ZAP, Metasploit, Nmap, Wireshark, Splunk Enterprise, Elasticsearch/ELK Stack, Microsoft Sentinel, Sysmon, NXLog, Kali Linux, Ubuntu

Programming & Scripting: Python, Bash, FastAPI, TypeScript, Next.js, SQL

Query Languages: SPL (Splunk), KQL (Microsoft Sentinel)

Frameworks: MITRE ATT&CK, NIST CSF, NIST SP 800-61, OWASP Top 10, Cyber Kill Chain, ISO 27001

Domains: Cloud Security (AWS – in progress), AI/LLM Security (prompt injection, SSRF via agents), Identity & Access Management, Endpoint Security

CERTIFICATIONS

CompTIA CySA+ (CS0-003) (*tier above Security+*) – Threat Detection, Vulnerability Management & SIEM Analysis | Credential ID: COMP001022978196

Google Cybersecurity Professional Certificate | 2024

ACHIEVEMENTS

3rd Place – MP Police Cyber Hackathon 2025 | **Top 10 Finalist** – IIT Madras Malware Analysis Hackathon

Top 5% Global Ranking – TryHackMe (3M+ users worldwide) – hands-on offensive and defensive CTF labs
