SUMMARY

Security Operations and Detection Engineering enthusiast with hands-on experience in SIEM analysis, log correlation, threat detection, and incident response workflows. Built a production-grade AI-powered SOC/XDR platform with real-time log ingestion, MITRE ATT&CK-mapped detection rules, CTI enrichment, and SOAR automation. Certified in CompTIA CySA+ and AWS Cloud Practitioner, with strong skills in Splunk SPL, KQL, Python scripting, network traffic analysis, and vulnerability management – dual offensive and defensive expertise enabling adversarial root-cause analysis of detections.

EDUCATION

VIT Bhopal University

B.Tech in Computer Science | CGPA: 8.07

Bhopal, India

Aug 2023 – Present

EXPERIENCE

The Red Users

Delhi, India

Cybersecurity Intern – SOC Analysis & Threat Detection

Feb 2025 – Mar 2025

- Monitored and triaged 50+ network and host-based security events using Wireshark and Splunk SIEM; correlated Windows and Linux event logs (Event IDs: 4625, 4624, 4720, 4688) to identify attack patterns including brute-force, privilege escalation, and lateral movement – charted against MITRE ATT&CK techniques (T1110, T1078, T1021).
- Conducted web application vulnerability assessments (WebGoat) with Burp Suite and OWASP ZAP, documenting OWASP Top 10 findings with remediation recommendations; developed Python scripts to automate log parsing and alert triage, and authored SOC playbooks for 5+ recurring attack categories.

PROJECTS

AI-Powered SOC/XDR Platform v3.0 | FastAPI, Elasticsearch, Next.js, Python, Google Gemini, NXLog, Sysmon

- Architected a full SIEM/XDR pipeline (NXLog → FastAPI → Elasticsearch) with real-time Windows/Sysmon log ingestion and normalization; built custom detection rules for brute-force (T1110), privilege escalation (T1078), LOLBin abuse (T1218), and lateral movement (T1021), modeled against NIST SP 800-61 IR phases and MITRE ATT&CK Navigator.
- Engineered a CTI enrichment pipeline integrating AbuseIPDB and AlienVault OTX for live IOC reputation scoring and threat categorization; implemented AI-assisted alert triage via Google Gemini and built a SOAR engine with rule-triggered playbooks and automated containment actions (IP blocking, host isolation) with full audit logging.

Threat Detection & Log Analysis Lab | Splunk, Wireshark, Sysmon, Windows Event Logs, Python, MITRE ATT&CK

- Built a home lab environment for hands-on SIEM analysis and threat hunting; ingested Windows Security, System, and Sysmon logs into Splunk and wrote SPL detection queries for brute-force (4625), account manipulation (4720, 4728), process injection (Sysmon 8), and LOLBin execution (4688).
- Performed network traffic analysis using Wireshark to identify anomalous patterns including port scanning, DNS tunneling indicators, ARP spoofing, and unencrypted credential transmission; documented findings with packet captures and detection logic catalogued across MITRE ATT&CK techniques.

TECHNICAL SKILLS

Security Operations: SIEM Analysis, Log Correlation, Alert Triage, Threat Hunting, Incident Response, Threat Detection Engineering, IOC Analysis, Vulnerability Management, Security Monitoring

SIEM & Detection Tools: Splunk Enterprise (SPL), Microsoft Sentinel (KQL), Elasticsearch/ELK Stack, Sysmon, NXLog, Wireshark, Nmap

Offensive Security (for detection context): Burp Suite, OWASP ZAP, Metasploit, Kali Linux, Penetration Testing, OWASP Top 10

Programming & Scripting: Python (log parsing, automation, triage scripting), Bash, FastAPI, SQL

Query Languages: SPL (Splunk Processing Language), KQL (Kusto Query Language)

Frameworks & Standards: MITRE ATT&CK, NIST SP 800-61, NIST CSF, Cyber Kill Chain, OWASP Top 10, ISO 27001

Domains: Endpoint Security, Network Security Monitoring, Identity & Access Management, Cloud Security (AWS), AI/LLM Security (prompt injection, SSRF via agents), Threat Intelligence

CERTIFICATIONS

CompTIA CySA+ (CS0-003) – Threat Detection, Vulnerability Management, Security Operations & SIEM Analysis | Credential ID: COMP001022978196

AWS Certified Cloud Practitioner | Issued Jun 2026

ACHIEVEMENTS

3rd Place – MP Police Cyber Hackathon 2025 | **Top 10 Finalist** – IIT Madras Malware Analysis Hackathon

Top 5% Global Ranking on TryHackMe (3M+ users worldwide) across SOC, threat detection, and offensive security labs
